DEPARTMENT OF POLITICAL SCIENCE

Academic Year 2021-22

Student Seminar

Seminars are for small groups of students studying the same course. They are normally led by a tutor in a seminar room. Seminars are designed for students to talk about topics in the course reading or lectures in detail, so students have to take an active part in the debate.

Objectives and Content

More than half of all institutions with first-year seminars list the fostering of academic skills and a commitment to easing the transition to college as objectives of the seminars. More specific course goals include orienting students to campus resources and organizations; fostering personal development in students; developing critical thinking and writing skills; introducing general education requirements and/or specific disciplines; encouraging career planning; developing a sense of community on campus; increasing student interactions with faculty and staff; and developing support networks and friendships among classmates.

Course topics include study skills and time management, both of which are central to fostering good academic habits. Personal development and self-concept are also common course topics, as are career exploration, campus resources, transition to college, diversity issues, academic advising and planning, and wellness issues.
