AWARNNESS ON HEALTH FOR GIRL STUDENTS

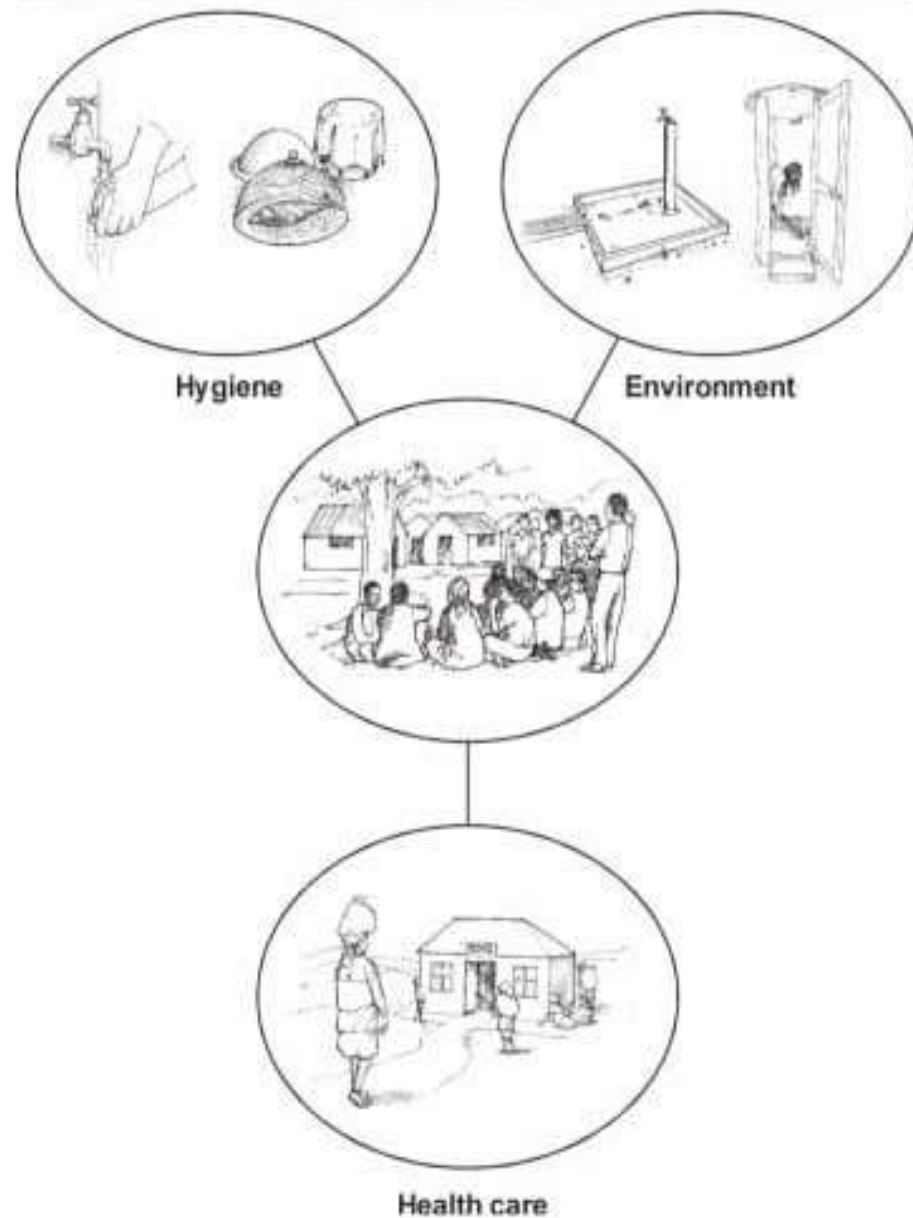

Dated: 25/11/2021

As per the proceedings of the principals our college" empowerment cell" arranged a guest lecture on "Awareness on health for girl students "our Principal Dr.D.Chitti Babu presided the meeting and Smt P. Tulasi kumari, lecture in charge, Dept. of history as resource person. She speak about the problems faced by the under graduate girls students and give some remedies and tips to the students on their health. Our Principal Sir Dr.D.Chitti Babu Sir also gave some key points regarding health. Smt A.Vani madam discuss some health issues and students' activity participated and asked some doubts.

Figure 2.1 *Linkages between factors that affect health*

environment helps prevent the spread of disease and may reduce depression. For example, safe and adequate water supplies, sanitation, drainage and solid waste disposal all benefit health by removing disease vectors from human contact. Dirty environments, by contrast, encourage the spread of disease and may adversely influence the mental and emotional well-being of individuals.

NATIONAL SERVICE SCHEME (NSS)

STUDENTS VACCINATION PROGRAMME

03-01-2022

There are several COVID-19 vaccines validated for use by WHO (given Emergency Use Listing). The first mass vaccination programme started in early December 2020 and the number of vaccination doses administered is updated on a daily basis on the COVID-19 dashboard.

The WHO Emergency Use Listing process determines whether a product can be recommended for use based on all the available data on safety and efficacy and on its suitability in low- and middle-income countries. Vaccines are assessed to ensure they meet acceptable standards of quality, safety, and efficacy using clinical trial data, manufacturing, and quality control processes. The assessment weighs the threat posed by the emergency as well as the benefit that would accrue from the use of the product against any potential risks.

In line with their national regulations and legislation, countries have the autonomy to issue emergency use authorizations for any health product. Domestic emergency use authorizations are issued at the discretion of countries and not subject to WHO approval.

Our college NSS Unit and Department of Zoology jointly organized Mega Vaccination Drive for our students in collaboration with local PHC on 3rd January 2021. Sri Jakkampudi Raja, MLA inaugurated the Drive and Principal Dr D.Chittibabu, NSS Co-Ordinator Sri S. Rajendra Prasad, HoD of Zoology Smt. A. Vani and other staff members coordinated the programme. Nearly 150 students were vaccinated with Covaxine.

National Girls' Day is **celebrated** on January 24 every year. Girls' Day raises awareness on community care, rights, health, education, and social advancement. Celebrated to raise awareness among the people about the problems faced by girls in the society. Awareness programs on education, nutrition, legal rights, medical care, protection, dignity, child marriage, about inequality about the girl child.

Celebrated to promote the status of women in society. It is very necessary to eliminate the various forms of social discrimination and exploitation that girls usually face in their life. To raise awareness about the need for women in society, various political and community leaders are telling people about girls for equal education and basic freedom.

WOMEN EMPOWERMENT CELL

INTERNATIONAL WOMEN'S DAY

8th MARCH, 2022

Women are strong, powerful and invincible. With thousands of mantras encouraging women's existence every day, a special day is indeed a necessity to celebrate women's achievements in all aspects of life. Whether she's a teacher, homemaker, economist, engineer or pioneer, women have been making the world a better place with their infinite strength, determination and belief. With power enough to shatter the shackles of patriarchy, women are rising above societal hurdles every single day, making them a stronger force to reckon with, in modern times. This International Women's Day, we are celebrating and rejoicing the social, economic, cultural and political achievements of women all over the world. The day also marks a call to action for accelerating gender parity. As all women come together, significant activity is witnessed worldwide to celebrate women's achievements or rally for women's equality.

Theme for 2022

Every year, March 8 is celebrated as International Women's Day. This year, the goal is to create a gender-equal world. It is about celebrating a woman's success and raising awareness against bias. So we all should choose to 'challenge' to bring the change. The hashtags for this year are #ChooseToChallenge and #IWD2022.

Several missions have been created to do the same. We should celebrate tech women and

their innovations, applaud equality for women in sport, educate women on health choice decisions, build inclusive thriving workplaces, increase the visibility of creative women and forge their empowerment worldwide.

International Women's Day has been observed since the early 1900s. That was the time of great expansion and turbulence in the industrialized world that witnessed booming population growth and the rise of radical ideologies.

History

It was during 1908 that there was an ongoing critical debate amongst women regarding their oppression and inequality. The campaign for change started to become more vocal when 15,000 women marched through New York City demanding shorter hours, better pay as well as voting rights. In 1909, the first Women's Day was observed across the United States. In 1910, an international conference of working women was held in Copenhagen. That's where the idea was proposed by Clara Zetkin, a leader of the Women's Office for the Social Democratic Party in Germany. In 1911, International Women's Day was honoured for the first time in Austria, Denmark, Germany and Switzerland on 19 March. Between 1913 and 1914, women in Russia observed their first Women's Day on February 23. Later, it was decided that March 8 can be the globally accepted day to celebrate IWD. International Women's Day was celebrated for the first time by the United Nations in 1975.

Colours of International Women's Day

Did you know there are also colours for the day? The three colours are purple, green and white. Purple signifies justice and dignity, green symbolizes hope and white represents purity, which was slightly marred by controversy. The colours originated from the Women's Social and Political Union (WSPU) in the UK in the year 1908.

Not many may be aware that International Women's Day is not specific to any country, group or organisation. The day belongs to women everywhere. Let us identify, celebrate and increase the visibility of women's achievements! There is a dire need for increased awareness through meaningful narratives, resources and activities to combat gender bias and discrimination.

We cannot be complacent. We all should play our part in bringing gender parity and we wish a very Happy Women's Day to all the ladies out there!

End of the article

Our college women empowerment organized "international women's day" on our campus by conducting an essay writing and musical chair competition to students on 7th March 2022. On 8th March 2022, we conducted a meeting with three distinguished guests. Our principal Dr. D. Chitti Babu Sir presided over the meeting. Chief guests are Smt M. Sunitha Deputy Tahsildar, Smt R. Sujatha, Grade I secretary, and P. Sujana Kumari, voluntary organization, chairman distributed prizes to the students and gave their message.

Gender Discrimination

Introduction

Gender is a common term where as gender discrimination is meant only for women, because females are the only victims of gender discrimination. Gender discrimination is not biologically determined but it is determined by socially and the discrimination can be changed by the proper and perpetuate efforts. Denial of equality, rights and opportunity and suppression in any form on the basis of gender is gender discrimination.

Half of the world's population is females. They are doing two-third of work of the total work in the world but received only one-tenth of the world's total income. Nearly two-third of the women is illiterates and they have possessed only one percent of the total world's assets. In the world only one-fourth of the families are headed by female. India is a male dominant society and gender discrimination is customized habitually.

ABSTRACT

Gender is a common term where as gender discrimination is meant only for women, because females are the only victims of gender discrimination. Females are nearly 50 percent of the total population but their representation in public life is very low. Recognizing women's right and believing their ability are essential for women's empowerment and development. This study deals with gender discrimination in India, its various forms and its causes. Importance of

women in development, legislation for women and solution for gender discrimination are also discussed in this paper.

Key Words:

Gender discrimination, women's development, legislation for women, education, employment, economic independence, empowerment, decision making and self confidence

Child marriage refers to the marriage of a child younger than 18 years old, in accordance to Article 1 of the Convention on the Right of the Child. In simple terms, child marriage is the marriage of a person aged before majority. As a derivative interpretation of several international documents, it is a violation of human rights.² While child marriage affects both sexes, girls are disproportionately affected as they are the majority of the victims. Child marriage and child betrothal are oftentimes practices that are related to customary and religious beliefs, along with a lot of relevant economic considerations. They occur globally, in many parts of Africa and Asia and to some extent in the Americas. Globally, 36 per cent of women aged 20–24 were married or in union before they reached 18 years of age.³ An estimated 14 million adolescents between 15 and 19 give birth each year. Girls in this age group are twice as likely to die during pregnancy or childbirth as women in their twenties.⁴

Most often an arranged marriage, children, especially girls, are married off early – sometimes just after puberty, and sometimes even before – so as to bring the family some monetary earning. In many communities, a young girl brings in a lot of dowry – it doesn't matter that these girls may be too young to marry, it doesn't matter that the man she is married off to, is easily double, triple or even four times her age. These communities place significant emphasis on the fact that a woman is not allowed, or is deemed incapable of being educated or working. There is also a belief that women must reproduce early enough because they have a shorter reproductive life period in relative comparison with men.⁵ In many parts of Asia and Africa, families give birth to many children so that enough of them survive, and enough of them help by being more hands to work. If these children are sons, these families deem them economically viable assets to the family. If these children are girls, they are redundant to the family's economy except when they are married off – until which time they are only more mouths to feed.

AWARENESS PROGRAM ON CYBER CRIME

09-01-2023

ORGANIZED BY
WOMEN EMPOWERMENT CELL

A Brief Study on Cyber Crime and Cyber Law's of India

INTRODUCTION

The invention of Computer has made the life of humans easier, it has been using for various purposes starting from the individual to large organizations across the globe. In simple term we can define computer as the machine that can stores and manipulate/process information or instruction that are instructed by the user. Most computer users are utilizing the computer for the erroneous purposes either for their personal benefits or for other's benefit since decades [1]. This gave birth to "Cyber Crime". This had led to the engagement in activities which are illegal to the society. We can define Cyber Crime as the crimes committed using computers or computer network and are usually take place over the cyber space especially the Internet [2]. Now comes the term "Cyber Law". It doesn't have a fixed definition, but in a simple term we can defined it as the law that governs the cyberspace. Cyber laws are the laws that govern cyber area. Cyber Crimes, digital and electronic signatures, data protections and privacies etc are comprehended by the Cyber Law [3]. The UN's General Assembly recommended the first IT Act of India which was based on the "United Nations Model Law on Electronic Commerce"

OBJECTIVE

The principle target of our paper is to spread the knowledge of the crimes or offences that take place through the internet or the cyberspace, along with the laws that are imposed against those crimes and criminals. We are additionally trying to focus on the safety in cyberspace.

CYBER CRIME AND CYBER LAW

We can define "Cyber Crime" as any malefactor or other offences where electronic communications or information systems, including any device or the Internet or both or more of them are involved . We can define "Cyber law" as the legal issues that are related to utilize of communications technology, concretely "cyberspace", i.e. the Internet. It is an endeavor to integrate the challenges presented by human action on the Internet with legacy system of laws applicable to the physical world .

Cyber Crime

Sussman and Heuston first proposed the term "Cyber Crime" in the year 1995. Cybercrime cannot be described as a single definition, it is best considered as a collection of acts or conducts. These acts are based on the material offence object that affects the computer data or systems. These are the illegal acts where a digital device or information system is a tool or a target or it can be the combination of both. The cybercrime is also known as electronic crimes, computer-related crimes, e-crime, high- technology crime,

information age crime etc.

In simple term we can describe "Cyber Crime" are the offences or crimes that takes place over electronic communications or information systems. These types of crimes are basically the illegal activities in which a computer and a network are involved. Due of the development of the internet, the volumes of the cybercrime activities are also increasing because when committing a crime there is no longer a need for the physical present of the criminal.

History of Cyber Crime

The first Cyber Crime was recorded within the year 1820. The primeval type of computer has been in Japan, China and India since 3500 B.C, but Charles Babbage's analytical engine is considered as the time of present day computers. In the year 1820, in France a textile manufacturer named Joseph-Marie Jacquard created the loom. This device allowed a series of steps that was continual within the weaving of special fabrics or materials. This resulted in an exceeding concern among the Jacquard's workers that their livelihoods as well as their traditional employment were being threatened, and prefer to sabotage so as to discourage Jacquard so that the new technology cannot be utilized in the future

Evolution of Cyber Crime

The cyber crime is evolved from Morris Worm to the ransom ware. Many countries including India are working to stop such crimes or attacks, but these attacks are continuously changing and affecting our nation.

Government degree college Seethanagarm the Department Of Women Empowerment Cell Conducted Awareness Program on cyber crime 09-01-2023. The main aim of this programme is awareness on cyber crimes. Sankranti Sambaralu

Department of women Empowerment and college organized an event on Sankranti sambaralu on 10th January, 2023. Our principal Dr.D Chitti babu inaugurated the event speaks about the importance of sankranti sambaralu to our students & staff. 150 students are participated. Rangoli competition also conducted and students actively participated.

Sri. Hari ram, Sri. Madina, Sri. S.Ch.V.Sivaji, Smt. P. Tulasi Kumari Sri. D.Raju, Dr. E.S.R.S. Sarma, Smt. A. Vani, Smt. N. Meenakshi Smt. G. Padma, are actively participated in the event.

Makar Sankranti

The meaning of the word Makar Sankranti came from two words Makar and Sankranti. The meaning of Makar is Capricorn, and the meaning of Sankranti is the transition, which makes Makar Sankranti as the transition of the sun in the Capricorn (zodiac sign). It is a very auspicious and sacred occasion, according to Hinduism.

There is also a belief that taking a dip in the holy water of 'Triveni Sangam' which is the point where three holy rivers met that is Ganga, Yamuna and Saraswati at Prayagraj on the day of Makar Sankranti during the time of 'Kumbh Mela' has great importance in the Hindu religion.

One of the crucial parts of Makar Sankranti is doing charity. Donating wheat, rice, and sweets to the people in need is part of the festival. The one who donates with an open heart, God will bring prosperity and happiness in their life and remove all the difficulties. That is why in Uttar Pradesh and Bihar, it is called Khichdi.

AWARENESS PROGRAM ON WOMEN'S SAFETY

03-02-2023

**ORGANIZED BY WOMEN EMPOWERMENT
CELL**

A Brief Study on WOMEN'S SAFETY of India

To address the increasing crimes against women and children in metros, B.PAC has launched a Safety initiative for Women and Children under the banner of B.SAFE. B.SAFE is committed to a fully fledged program, engaging all stakeholders to advocate the rights of women and children while sensitizing and engaging the community and larger public on this issue. Our women and children have the right to safe and secure environment at work, in schools and in public places.

B.PAC has constituted two expert groups one focused on Women Safety and the other on Child Safety. These groups are tasked with identifying and implementing, with support from all key stakeholders critical action plans which encompasses both in helping prevention of violence, emergency response mechanism and in understanding the judicial redressal system in case of an untoward incident. The programs will be wide ranging from creating large awareness campaign among st the public, to training for gender sensitization of key constituents, to informing and educating people on existing laws, which safeguard women and child rights. Working with support from key departments of the Government, active engagement of police and expertise of

INTERNATIONAL WOMEN'S DAY

President: Dr. D.Chitti Babu, Principal

Chief Guest : P. Venkata Hyma

Asst. Executive Engineer polavaram

Honorable Guest : Y. Madhuri

Asst. Executive Engineer polavaram

Organized by Women Empowerment

International Women's Day is celebrated in many countries around the world. It is a day when women are recognized for their achievements without regard to divisions, whether national, ethnic, linguistic, cultural, economic or political.

Since those early years, International Women's Day has assumed a new global dimension for women in developed and developing countries alike. The growing international women's movement, which has been strengthened by four global United Nations women's conferences, has helped make the commemoration a rallying point to build support for women's rights and participation in the political and economic arenas.

Innovation and technology for gender equality

Our lives depend on strong technological integration: attending a course, calling loved ones, making a bank transaction, or booking a medical appointment. Everything currently goes through a digital process.

However, 37% of women do not use the internet. 259 million fewer women have access to the Internet than men, even though they account for nearly half the world's population.

If women are unable to access the Internet and do not feel safe online, they are unable to develop the necessary digital skills to engage in digital spaces, which diminishes their opportunities to pursue careers in science, technology, engineering, and mathematics (STEM) related fields. By 2050, 75% of jobs will be related to STEM areas. Yet today, women hold just 22% of positions in artificial intelligence, to name just one.

Bringing women into technology results in more creative solutions and has greater potential for innovations that meet women's needs and promote gender equality. Their lack of inclusion, by contrast, comes with massive costs.

The United Nations Observance of IWD, under the theme “DigitALL: Innovation and technology for gender equality”, recognizes and celebrates the women and girls who are championing the advancement of transformative technology and digital education. The observance will explore the impact of the digital gender gap on widening economic and social inequalities, and it will also spotlight the importance of protecting the rights of women and girls in digital spaces and addressing online and ICT-facilitated gender-based violence.

Government degree college Seethanagarm the Department Of Women Empowerment Cell Conducted Awareness Program on womens day 08-03-2023. The resource person are P.
